EDUCATION

Guru Nanak Dev University, Amritsar

2022-2026

Bachelor of Technology in Computer Science and Engineering

EXPERIENCE

• **SkillStone by Grazitti Interactive**

May 2025 – Oct 2025

Full Stack Trainee

- Developed full-stack features using the MERN stack (MongoDB, Express.js, React.js, Node.js)
- Integrated REST APIs, implemented reusable components, and followed Agile development practices.
- Worked in Agile sprints with Git/GitHub for version control, implemented unit testing and debugging routines.

PROJECTS

• **HeliosPredict**

Solar power generation predictor

<https://github.com/sarthak-dhiman/HeliosPredict>

- Tools & technologies: Python, TensorFlow, Pandas, NumPy, Matplotlib, Seaborn, WeatherAPI
- AI-driven model to predict solar energy production based on historical weather data & plant output.
- Developed a machine learning model in Python and TensorFlow.
- Integrated weather APIs with ML pipeline and deployed on AWS EC2 (Linux), simulating an IoT-driven energy prediction system with real-time data ingestion and analysis.

• **Capriconus**

Achievement tracker and library manager

<https://github.com/sarthak-dhiman/Capriconus>

- Tools & technologies: Electron, React, Redux, Tailwind CSS, FastAPI, PostgreSQL
- Cross-platform desktop app to manage local game libraries.
- Architected a scalable backend with FastAPI and PostgreSQL to manage large, dynamic game libraries.
- Implemented secure authentication and CRUD APIs, ensuring data integrity and reliability.

• **MiniDFS**

Miniature distributed file system

<https://github.com/sarthak-dhiman/MiniDfs>

- Tools & technologies: C++, TCP protocol, FastAPI, Uvicorn, Docker, Docker Compose, Azure/AWS
- A high-performance C++ TCP server handling file uploads, downloads, and directory management
- Containerized with Docker Compose, deployable to Azure/AWS
- Designed for secure data transfer, fault tolerance, and reliable transaction handling, aligning with payment and authentication system principles

SKILLS

Languages: C++, Java, Python, SQL

Developer Tools: Git, GitHub, Node.js, AWS EC2, Docker, CI/CD (GitHub Actions)

Frameworks & Libraries: Spring Boot, Django, React.js, Redux, TensorFlow

Databases: PostgreSQL, MongoDB, SQL, Familiarity with Oracle/PL SQL

Backend & APIs: REST APIs, Microservices Architecture, FastAPI

Testing: JUnit, Mockito, Unit Testing

Soft skills: Communication, Collaboration, Problem Solving, Strong foundation in Data Structures and Algorithms (DSA)

CERTIFICATIONS

• **Python Certification – HackerRank**

Feb 2025

• **Java Certification – HackerRank**

Feb 2025

• **Hewlett Packard Enterprise - Software Engineering Job Simulation**

Aug 2025
